📄 Summary

M.Sc. Computer Science student at Paderborn University and software developer with **1.5 years** of experience shipping production systems end-to-end. I have a strong ability to rapidly acquire new skills and adapt to evolving technical environments. Core stack: **Node.js, Express, PostgreSQL, and React.js**, with hands-on experience building conversational AI solutions and LLM-powered tools using OpenAI and Anthropic APIs.

💼 Experience

Aug 2024 – Sept 2025
Freelance Backend
Engineer

Self-Employed

Backend and integration work for education-sector clients in India.

- Integrated **LanguifyAI API** into Fly The Nest, enabling AI-powered interview preparation where students answer instructor-configured questions and receive automated AI-based feedback and scoring.
- Built an **AI-powered audio assistant** for Alexi, designed for kindergarten students. Integrated the **OpenAI API** to handle voice responses, with interactive educational quizzes covering fruit recognition, counting, and similar early learning activities.

Feb 2024 – July 2024
Backend Intern

DeetsDigital, India

A software consultancy delivering custom web platforms and solutions for education and finance clients.

- Built and maintained a **Node.js/Express** backend for **Fly The Nest**, an online education platform serving **150+ students**, with **Zoom Video SDK** integration in **React.js** for virtual classrooms.
- Optimised **Python/Flask** underwriting APIs, achieving a **40% runtime reduction** through query tuning and caching, cutting operational costs.
- Implemented **OAuth 2.0** SSO with **Azure AD** and role-based access control, enabling permission-scoped **PowerBI** dashboard access across internal teams.

🎓 Education

Oct 2025 – Present
Paderborn, Germany

M.Sc. Computer Science

Paderborn University

July 2024
India

Bachelor of Technology in Computer Engineering

Pandit Deendayal Energy University

Equivalent: German grade 1.5 (sehr gut)

{ } Skills

Frontend

- React.js
- Next.js
- Tailwind CSS
- JavaScript
- TypeScript

Backend

- Node.js
- Express.js
- RESTful APIs
- Microservices
- Python
- Redis

DevOps & Tools

- AWS (EC2, S3, CloudFront)
- Docker
- CI/CD
- Git
- Jest

Databases

- MongoDB
- MySQL
- PostgreSQL

Projects

Dec 2025

Qno - Quantum-Themed Uno Card Game

Course project under Prof. Dr. Yasemin Acar, Human Factors in Security and Privacy, Paderborn University.

- Built a web-based multiplayer card game using **React.js**, **Node.js**, and **WebSockets** to teach quantum computing concepts (quantum gates, superposition, entanglement).
- Designed a quantitative survey to measure whether gamified learning improves student understanding of quantum threats to cryptography.

Jan 2024

Chorus: A Music Guessing Game with Spotify Integration

- Developed a Wordle-inspired music guessing game integrating the Spotify Web API for artist-based personalized gameplay and the Spotify Web Playback SDK for in-browser audio streaming, with a responsive React.js frontend.

July 2024

MiraTech

- Smart mirror built during undergraduate studies. Features included brush timer, music playback, live weather via external APIs, face detection, voice response, and motion-triggered automatic lighting. Integrated hardware and software into a single autonomous system.

Hobbies

Homelabbing

Home Server Infrastructure, Ubuntu Server, Docker, Proxmox, Tailscale, Nginx Proxy Manager, Cloudflare DDNS, Wildcard SSL. Self-hosted stack deployed on personal hardware with static IP and custom domain.

Languages
